1. If we remove "homeowner sites" (yard/garden) will 36029-20 still be considered homeowner use or is it now restricted use?
2. If it is now considered restricted, we would have to apply for a new registration? A homeowner use ground squirrel product using a pre loaded bait block bait station just to be used in and around yard/garden areas?

Because Diphacinone is the active ingredient and it has the wording yard and garden areas, we have to make such drastic changes to our product? It's not labeled for in home use, nor for rats or mice, it comes in a package of 4lbs only with a CRC lid, requires a tamper resistant bait station be used for all applications. Is there any way to file for an exemption?

Thank you for your time,
Blake Hazen

Re: EPA-HQ-OPP-2006-0955

Mr. Peacock,

Can we set up a time for me to call you with some questions I have? Let me know what day and time works for you.

Thank you,

Blake

Dear Mr. Hazen,

In your E-Mail of July 8, 2008, you asked us to confirm how the Agency's May 28, 2008 "Risk Mitigation for 10 Rodenticides" would affect four (4) of your Diphacinone products: 36029-17, 36029-20, 36029-23, and 36029-24.

The attached table lists these products and indicates if they are subject to the Final Rodenticide Risk Mitigation Decision and why it is subject to the Decision. 36029-20 is the only one subject to the Decision.

(See attached file: 36029-17,-20, -23, -24, Wilco, Sub to Rod Final Risk Mit Mea.doc)

Please contact me if you have any questions about this E-Mail and the attachment.

Thank You,

Daniel B. Peacock, Biologist

20 EPA-HQ-OPP-2006-0955

Hello Mr. Peacock,

Can you give me a better picture on how EPA-HQ-OPP-2006-0955 is going to effect 36029-17, 36029-20, 36029-23, and 36029-24? I don't believe 36029-17 and 36029-23 will be effected being Ag use baits? EPA-HQ-OPP-2006-0955 applies (if I understand correctly) to homeowner use bait equal too or less than a pound and labeled for indoor/outdoor use (as far as our labels are concerned). 36029-20 and 36029-24 are not considered to be "consumer use products" even though they are marked for homeowner use, they weigh more than a pound but not over 4, is not labeled for indoor use. Maybe I need to read EPA-HQ-OPP-2006-0955 again. Any and all information will be very helpful. Thank you for your time and have a great week.

Sincerely,
